ISR

INTERDISCIPLINARY SCIENCE REVIEWS

Volume 13

Dr Anthony R. Michaelis
Editor

ISCRDB 13(1–4) 1–384 (1988)
ISSN 0308–0188

J W Arrowsmith

CONTRIBUTIONS

NUMBER 1

Editorial: **The Falkland Islands: The Ideal Antarctic Base**	Anthony R. Michaelis	1
Comment: **The Politics of Dying Forests**	Sonja Boehmer-Christiansen	5
Comment: **A School of Engineering and Diplomacy: The Legacy of Lesseps**	Frank P. Davidson	9
Science and Politics: Expectations, Errors and Clarifications	Ralf Dahrendorf	12
The Role of Motivation in Scientific Research	Jerome Karle and Isabella L. Karle	18
Performance Limits of Sensory Organs	Hansjochem Autrum	27
Enigmatic Death Due to 'Social Stress': A Problem in the Strategy of Research	S. A. Barnett	40
The Integrative Power of Interdisciplinary Geography	B. G. Thom and E. Woolmington	52
Genius, Gender and Culture: Women Mathematicians of the Nineteenth Century	Patricia Rothman	64
Acid Rain: Its Causes and Consequences	Sir John Mason	73
Correspondence	Vance Hall and Erhard Scheibe	82
Book Reviews		
The Gunpowder Epic	Anthony R. Michaelis	88
Agricultural Geography – A Social and Economic Analysis	David Pimentel	91
Great Laboratories	Trevor Williams	92
Interdisciplinary Analysis and Research	Martha Russell	93
Vanishing Animals	Marcia Edwards	93
Issues Management	Basil Bard	94
The Periodic Table	Hugh Harvey	95

NUMBER 2

SPECIAL ISSUE: EUROPEAN SPACE AGENCY

Editorial: **ESA – Partners into Space**	Anthony R. Michaelis	97
Comment: **Space Panorama – Europe's Future Programmes**	R. Lüst	100
Europe's Political Will for Space	R. W. De Korte	106
Horizon 2000 – Updating the Plan and Its Progress	R. M. Bonnet	110
International Cooperation: The Inter-Agency Consultative Group for Space Science	R. Z. Sagdeev and R. Reinhard	115
Halley's Comet – Its Secrets Revealed	R. Reinhard	123

How Europe Could Best Use Remote Sensing Programmes	Sikke A. Hempenius and Caesar Voûte	132
Satellite Observations for Weather Forecasting	K. H. Stewart	140
Biomedical Research and Application in Space: Status and Perspectives of European Activities	Karl Egon Klein	146
The Space Station	Ernesto Vallerani	156
The Ariane Family	Frederic D'Allest	166
HOTOL, an Economic Space Transport for Europe	B. R. A. Burns	171
The European Spaceplane Hermes and Future Transportation Systems	J. Fuestel-Büechl	180
Biographies		189

NUMBER 3

Editorial: **Millenium III: An Invitation to Propose a Monument for AD 2001**	Anthony R. Michaelis and Roger F. Malina	193
Comment: **A Utopian Change of Mind**	Romesh Thapar	195
Comment: **Separation and Purification – More Interdisciplinary Work Needed**	Sir Arthur Vick	198
Comment: **Towards a Central Dogma for Psychology**	Norman D. Cook	201
Comment: **Scientists and Philosophers: Allies or Antagonists?**	A. Rupert Hall	204
Comment: **For a Renaissance of the Humanities**	Rudolf Smend	208
Current Trends and Environmental Research Needs	Jesse H. Ausubel	211
Light and Reef-Building Corals	Bruce E. Chalker, David J. Barnes, Walter C. Dunlap and Paul L. Jokiel	222
Brugge–Zeebrugge: The New Belgian Harbour on the North Sea	Robert de Paepe	238
The Banknotes of Science: A Neglected Art of Science and Technology	Anthony R. Michaelis	251
The Design of Historical Gardens: Cultural, Magical, Medical and Scientific Gardens in Europe	James Stevens Curl	264
Theatre Review	Donald Michie	282
Book Reviews		
Space Station	Sylvia D. Fries	283
Knowing Everything about Nothing	Hugh Harvey	284
World Food Production	Joseph H. Hulse	284
Louis Armand – A Great Visionary	Frank P. Davidson	285
History of McDonald Observatory	Colin Ronan	286
Antarctic Science	Phillip Law	286
Polar Transport	R. B. Thomson	287
Leaf Protein	M. A. Crawford and K. Ghebremeskel	288

NUMBER 4

Editorial: **The Great Challenge**	Anthony R. Michaelis	289
Comment: **The Three Environments**	Alexander King	291
Comment: **Poverty and Population Growth in India: The Myth and the Reality**	Sri Madhava Ashish	295
Comment: **Development is the Best Contraceptive**	Karan Singh	301
Comment: **Privatising the Universities**	Eric Ash	303
Comment: **Frauds in Science**	Konrad Bloch	306
Comment: **Defining 'Biotechnology'**	Jacques Richardson	310
Population-Supporting Capacities: A Case Study in the Central Himalayas	Paul J. Martins and Jagdish C. Nautiyal	312
Origin and Evolution of the Desert	Farouk El-Baz	331
The Origin of Life: More Questions Than Answers	Klaus Dose	348
The Growth of Rationalism in Our Concepts of Physical Nature	Hans Jörg Fahr	357
China's Interdisciplinary Science: English Language Abstracts		372
Book Reviews		
Japan's Secret War: U-234 and ^{235}U	Alan L. Mackay	374
Symbiosis	J. T. Baker	376
Scientific Instruments in Europe, 1400–1800	Anthony R. Michaelis	376

AUTHOR INDEX

Allest, F. d' 166
Ausubel, J. H. 211
Ash, Eric 303
Ashish, Sri Madhava 295
Autrum, H. 27

Baker, J. T. 375
Barnes, D. J. 222
Barnett, S. A. 41
Bloch, K. 306
Boehmer-Christiansen, S. 5
Bonnet, R. M. 110
Burns, B. R. A. 171

Chalker, B. E. 222
Cook, N. D. 201
Crawford, M. A. 288
Curl, J. S. 264

Dahrendorf, R. 13
Davidson, F. P. 9, 285
Dose, K. 348
Dunlap, W. C. 222

Edwards, M. 93
El-Baz, F. 331

Fahr, H. J. 357
Feustel-Büechl, J. 180
Fries, S. D. 283

Ghebremeskel, K. 288

Harvey, H. 95, 284
Hempenius, S. 132
Hulse, J. H. 284

Jokiel, P. L. 222

Karle, I. 18
Karle, J. 18
King, A. 291
Klein, K. E. 146
Kohn, A. 306
Korte, R. W. de 106

Law, P. 286
Lüst, R. 100

Mackay, Alan L. 373
Malina, R. F. 193
Martins, P. J. 312
Mason, Sir J. 73
Michaelis, A. R. 1, 88, 97, 193, 251, 289, 375
Michie, D. 282

Nautiyal, J. 312

Paepe, R. de 238
Pimentel, D. 91

Reinhard, R. 115, 123
Richardson, J. 310
Ronan, C. 286
Rothman, P. 64
Russell, M. 93

Sagdeev, R. Z. 115
Singh, K. 301
Smend, R. 208
Stewart, K. H. 140

Thapar, R. 195
Thom, B. G. 52
Thomson, R. B. 287

Vallerani, E. 156
Vick, Sir A. 198
Voûte, C. 132

Williams, T. 92
Woolmington, E. 52

SUBJECT INDEX

Academy Programme 209
Acidification of streams and lakes 73
Acid rain 5, 73, 219, 289
  research on 73
Aeolean processes, in desert 336
  on Mars 341
Agricultural geography 91
Agriculture, in desert 334
  and Hopi Indians 337
  energy balance in 284
  in Europe, remote sensing and 139
  in Himalayas 319
Alchemy, and garden design 264
Algae, endosymbiotic, and reef-building corals 222
Almora District (India) 314
Aluminium toxicity, and acid rain 79
Amino acids, in Precambrian sediments 353
Antarctica, exploitation of minerals in 287
  1
Antarctic research, and Falkland Islands 1
Antarctic science 286
Antarctic treaty 2
Animals, vanishing 93
Apollo-Soyuz Test Project 157, 158
  and desert studies 336
Aquifers, depletion of 333
Ariane, commercialisation of 168
  family 166
  management of 167
  propulsion system of 166
Ariane-5 102
  and Hermes 181
Arab astronomers 358
Archaeology, and Chinese military technology 89
  and desert studies 342
Aridity index 334
Aristotle 349
Armand, Louis 285
Art, science as 84
Arts, in Germany 209
  role of 208
  and sciences 208
Astronaut, ESA science 146
Astronomers, Arab 358
Astronomy, X-ray 101
  and McDonald Observatory 286
Atmosphere 121
  chemistry of 219
  prebiotic 351
  sounding of 142
Atmospheric chemistry, and acid rain 74
Atomic nucleus, and vacuum 366
Australia, scientific banknotes of 253

Banknote design 253
  scientific, complexity of 260
  fashions in 259
Banknotes, history of 251
  as national visiting cards 252
  literature and history of 263
  of science 251
  scientific, as source of history 259
Battle-gardens, English 274
  and topiary 271
Beach restoration, after Belgian port construction 246
Behavioural geography 57
Bernhard, Prince, of the Netherlands 291
Bhopal 195, 213
Big Bang cosmology 361
Biochemical predestination 349
Biogenics 311
Biological engineering 311
Biology, central dogma in 201
  gravitational 149
  and IQ sex differences 64
  molecular cell 349
Biomedicine, defined 147
  and space 146
Biotechnology 199, 310
Black holes, and vacuum 366
Blenheim at Windsor (battle-garden) 274
Brain, laterality of 202
Breakwaters, at Zeebrugge 242
  construction of 244
  studies for 244
Bridges, on banknotes 255
British Aerospace, and HOTOL 171
Brugge-Zeebrugge 238
Bruges seaport. *See* Zeebrugge 238
Buddhism, and nature 370
Burt, Cyril 306

Canopus at Tivoli 265
Capia, Fritjof 54, 370
Cattle, in Himalayas 328
Causality, as heuristic principle 359
Cemetery design, 18th-century 280
Challenger accident 283
  consequences of 111
Change, mechanism of 195
  working for 197
Channel tunnel 285
Chemistry, of the environment 219
  and coral reefs 225
  soil, and acid rain 78
Chernobyl 195
  Landsat and 104
China, science in 88
Chirality, origin of 352
Chladni figures, Sophie Germain and 67
Chretian, J. L. 146
Christianity, and funerary gardens 266
Cities, growth of giant 214
Clays, and origin of life 353
Climate, past, in Sahara 346
Club of Rome 291
Cocktail party effect 34
Coins, scientists on 258
Columbus programme 102, 164
Comet. *See* Halley's Comet
  formation of 123
  Giacobini-Zinner 115
  Nucleus Sample Return mission 112
Cometary dust 127
Contraception, and poverty 296
Contraceptive, development as 301
Corals, light and reef-building 222
  reef community performance 228
  reproduction, and moonlight and tides 233
  and night irradiance 234
  research on 222
Corona 120
Cosmic radiation, hazard of 153
Crystal Palace gardens, metaphysical aspects of 280
Culture, genius and gender 64

Dams, on banknotes 256
Darwin, Charles 350
Data, manipulation of 306
Demon, Laplacian 359
Death, enigmatic, in rats 40
Deforestation 298
  in Himalayas 312
Desert, aeolean processes in 336
  agriculture in 334
  Apollo-Soyuz Test Project and 336
  distribution of 332
  Earth and Mars 346
  environmental changes in 344
  evolution of 341
  origin 331
  reclamation 333
  and space observations 342
  and Mars 336
Desertification 345
Development, and contraception 301
  strategy, for Indian agriculture 297
Diplomacy and engineering, school of 9–11
Disasters, and management science 9
Dunes, barchanic 338
  in China 339
  in desert 337
  in Egypt 337
  in India 338
  in Pakistan 338

Ecological theory, applications of 217
Ecology, and economy 313
  and enigmatic death 49
  and PSC 315
Economics, and science and technology 291
Economy, and ecology 313
  and environment 313
  of Himalayas 312
Ecosystem perturbation, and coral reefs 229
Education, and Meteosat 142
  and population explosion 290
  purpose of 205
  and technology take-up 135
Egoism, individual 293
  national 293
Einstein, and vacuum 365
Emission standards 5

Empedocles 349
d'Enghien, Duc, gardens of 273
Engineering and diplomacy, school of 9
Engineering, and management 285
and Sahel drought 10
Enigmatic death 41
Enlightenment, gardens of the 280
Environment, and economy 313
and high technologies 213
and livestock 328
and population 325
protection of 199
standard-setting for 218
'total' concept of 211
Environmental changes, in desert 344
Environmental degradation, and desert 333
Environmental management, remote sensing and 136
Environmental movements, in Third World 137
Environmental organisations 215
Environmental problems, in India 298
Environmental rehabilitation, and money 317
Environmental research needs 211, 215
Environmental trends 211
Environments, three 291
Erasmus Prize 291, 294
Erosion, wind 336
ESA. *See* European Space Agency
E. coli Qβ replicase 355
Ethics, in science 306
Ethology, and enigmatic death 49
Eumetsat 142
Europe, and weather satellites 145
European Retrievable Carrier (Eureca) 111, 149
European Space Agency 97
European Space programme, costs of 108
Evolution, chemical 349, 352
Darwinian 348
and enigmatic death 48
molecular 349
Extinction, of species 93
Extrema principles 359
gain of rationality by 362

Falkland Islands, as Antarctic scientific support base 1
Farming system, hill 319
Family planning. *See* Population
Female literacy, and population growth 295, 296, 301
Fermat principle 363
Fermats' last theorem, Sophie Germain and 68
Ferromagnetism, and symmetry break 362
Feyerabend, P. 13, 82, 85
Fishes, acid rain and 79
Fons signatus 267, 268
Food production, world 284
Forest die-back 5
Forgery, of banknotes 252
Franklin, B., and banknotes of science 253
Fraud in science 306
Fraud—*ctd.*
detection of 307
deterring 308
motivation for 307
French Revolution, and rationalism 358

Gaia hypothesis 216
Gardens, cultural, magical, medical and scientific 264
design of historical 264
funerary 266
future 279
Garden design, continuing tradition of 278
Gender, genius and culture 64
Genetic information, origin of 352
Genius, gender, and culture 64
Geodetics, and Fermat principle 363
Geographers, Third-World 60
Geography, agricultural 91
and coral reproduction 234
future of 62
history of 53
interpretive power of interdisciplinary 52
modern 56
and natural and social sciences 62
three-fold division of 58
Geology, and desert 331
and port construction 243
Geospace 121
Germain, Sophie 66
Germany, acid rain and 5
arts in 209
Giotto spacecraft, and Halley's Comet 117, 125
Gluons 369
Government, and science 292
and universities 304
Greenhouse effect 218, 219, 289
and Antarctica 287
Green Party, and acid rain in Germany 6
Green revolution 297
Guerike, Otto von, and vacuum 365
Gunpowder, invention of 88

Haeckel, Ernst 350
Hall, V. 82
Halley's Comet, exploration of 115
nucleus of 124
as object of study 123
secrets of 123
Hamiltonian principle 362
Harvey, William 350
Hawking, Stephen 366
Hearing, binaural 34
sensitivity of 28
Heidelberg, gardens at 270
Heat, concept of 364
Helioseismology 120
Herbalism, and garden design 264
Hermes spaceplane 103, 180
Hermetic wisdom, and garden design 264
Heterodyne spectroscopy 101, 112
Heterotrophic nutrition, and reef-building corals 228
Himalayas, population in 312
Hipparcos mission 101
Holism, and reductionism 54
Hopi Indians, desert agriculture and 337
Horizon 2000 100, 110
cornerstones of 111
Horror vacui 365
Hortus Conclusus 267
HOTOL 171
design features of 172
market prospects for 171
Humanities, renaissance of 208
Hume, David 359
Hydraulics, and garden design 264
Hydrogeology, and acid rain 78

ICE spacecraft, and Halley's Comet 124
Imperial College 303
India, agriculture, development strategy for 297
desert in 338
environmental problems in 298
population control in 301
population supporting capacities in 312
poverty and population growth in 295
Industry, and environment 213
and population supporting capacity 329
spatial concentration of 212
Inter-Agency Consultative Group for Space Science (IACG) 115
Halley's Comet 115
organisation of 118
Interdisciplinary analysis and research 93
Interdisciplinary geography 52
Interdisciplinary Science (Chinese journal) 372
International Astrolabe Society 305
International cooperation in space 115
International Institute for Applied Systems Analysis 215
International Space Station cooperation 164
Ionosphere 121
IQs, of men and women 64
Irrationality, and physics 357
and quantum mechanics 357
of science 84
Isis and the Madonna 265

Jackson, Sir R. G. A. 9
Japan, WWII atomic bomb program of 373
Johnson, Samuel, and science 205

Kierkegaard 195
Kilwarlin (County Down), Thermopyiae in (battle-garden) 278
Knot gardens 268
Kovalevskaya, Sofya 69

Laboratories, great 92
Land degradation, in Himalayas 312
Land management, computer requirements for 329
Land reclamation, in desert 333

Landsat, and Chernobyl 104
and desert studies 340
Laudan, L. 82, 85, 86
Leaf protein 288
Lesseps, F. de, legacy of 9
Levi, Primo 95
Lichtenberg, B. 159
Life, history of origin of 349
origin of 348
Life sciences, and space 146
Light, and reef-building corals 222
physical nature of 363
ultraviolet, and reef-building corals 230
visible, and reef-building corals 224
Linear programming, for population studies 320
Lovelace, Lady 71
Lysenko 306

McDonald Observatory, history of 286
Madonna, and Isis 266
Magnetosphere 121
Malnutrition, in developing countries 284
Malthus, and overpopulation 299
Man, and nature 205
Management, and engineering 285
Management science, and disasters 9
Mark, H. 283
Mars, aeolean processes on 34
desert studies and 336, 340, 346
geologic history of 341
mission to 113
and origin of life 355
Marxist geography 57
Mathematicians, women, of 19th century 64
Mazes, garden 271
Mechanistic materialism 359
Medicine, and satellites 135
and space 146
Merbold, Ulf 146, 159
Metals extraction 199
Metascience 206
Meteorology, and satellities 140
Meteosat 141
second generation 143
Microgravity 105, 146
physiological effects of 152
Middle Ages, gardens in 267
Migration, in Uttar Pradesh 319
Millennium III - a monument for AD 2001 193
Miller-Urey experiments 351
Mir space station 162
Molecular structure, and X-ray diffraction 21
Monument for AD 2000, immaterial 193
physical 193
Monopoles, magnetic 361
Moonlight, and coral reproduction 224, 233
Mysticism, and rationalism 370

NASA, ESA cooperation with 111
Natural philosophy 204
Nature, Buddhist view of 370
deterministic basis of 358
independent function of 363
and man 205
and supersymmetry 361
Neovitalism, era of 348
Noether, Emmy 71
Nomads, settlement of 333
Nuclear power, and acid rain 7
Nuclear warfare 289
Nuclear weapons, Japanese 373
Nucleic acids 352

Ocean research, and space 104
OECD, and science policy 292
Oil installations, on banknotes 256
Oparin, A. I. 350
Origin of life, hypotheses on 350
Overpopulation, and population-supporting capacity 313

Panspermia 350
Parapsychology and geography 62
Pasteur, Louis 350
Periodic Table, The 95
Petroglyphs, in Western Desert 343
Philosophers, and scientists 204
Philosophy, natural 204
and scientific research 18
Photoadaptation, by reef-building corals 226
Photosynthesis, and reef-building corals 226
Physics, central dogma in 201
and rationalism 357
solar-terrestrial 100
The Tao of 370
Physiology, and enigmatic death 45
human, and space 147
Plant growth hormones, false 307
Plasma physics, and Halley's Comet 130
Polar transport 287
Politics, of dying forests 5
European, and space 106
and population increase 296
and science 13, 373
and scientists 15
Polypeptides, synthesis of, from amino acids 353
Population, rodent, and crowding 42
Population Conference, World 301
Population control, in India 301, 326
Population explosion 196, 289, 290
Population growth, and female literacy 295, 296
Population problems, and Malthus 299
Population supporting capacities (PSC) 299, 312
dangers of exceeding 316
and ecological balance 315
and forced migration 316
modelling for 320
and standard of living 314
and trade 315
Port construction in Zeebrugge 238
stages in 242
Poverty, and contraception 296
of resources 298
Poverty—*ctd.*
and population growth, in India 295
rural 295
Prebiotic simulation experiments 352
Precipitation, acidity of 76
Predator-prey relationship 49
Primitive bodies 101
and IACG 119
Primordial soup 352
Privatisation, of universities 303
Protein, leaf 288
Protoproteins, and origin of life 353
Psychology, central dogma for 201
and enigmatic death 47
and geography 57
Purification and separation 198

Quantum mechanics, and irrationality 357
Quarkonian particle world 369
Quarks 369

Radioastronomy, and IACG 119
Radioisotopes, and coral reefs 224
Railways, on banknotes 255
Ratio, meanings of 357
Rationalism, and mysticism 370
and physics 357
starting point of 357
Rationality, and extrema principles 362
gain of, through algorithm 359
and symmetry 360
Rats, and enigmatic death 41
and human beings 42
Reality, mathematical 370
objective 207
and vacuum 369
Reductionism, and holism 54
Religion, and science 205
and gardens 238
Remote sensing 103
costs of 134
and desert studies 333, 334
and Europe 132
and future society 136
and technology market 132
turning point for 134
uses of 132
Renaissance, gardens in 268
Resources, poverty of 298
Ritual, and death, in rats 41
Rocket, origin of 90
Roman Empire, and garden design 264
Roman de la Rose, and garden design 268

Sahel 333
St Gall, gardens at 267
Salyut, and Mir 162
Salyut 1 157
Salyut 6 157
Salyut 7 159
Satellite, on banknote 257
for education 135, 290
geostationary 143
launch costs of 171
low-polar-orbit 144
and medicine 135
scientific 101
and weather forecasting 140

Scandinavia, acid rain and 73
Science, and arts 208
as art 84
as career 284
faith in 295
frauds in 306
and government 292
and politics 13, 373
sociology of 284
tragedy of 291
types of problem in 82
unacceptable 195
Science policy 292
Scientia in papyro 251
Scientific approach 52
Scientific instruments 375
collecting 376
Scientific life, decomposition of 13
Scientific research, motivation and 18
and philosophy 18
Scientific theories, comparison of 82
Scientists, on banknotes 258
list of 260
on coins 258
and philosophers 204
and politics 15
Sea-lock, at Brugge-Zeebrugge 241
Sensitivity, biological significance of 37
chemical 36
electromagnetic 37
olfactory 36
Sensory organs, performance limits of 27
Separation, industrial 198
and purification 198
Separation Science and Technology, US NRC Committee on 198
Seveso 195
Shackleton, Lord 4
Shuttle Imaging Radar, and desert 341
SITE (Satellite Instructional Television Experiment) 290, 301
Skylab 157
SO_2 and NO_x emissions 74
Social anthropology 66
Social stress, and enigmatic death 40
Society, defined 294
and technology, 133, 291
Sociology, of science 284
